HOLM SECURITY

Let our experts help you succeed

For many organizations, working with vulnerabilities poses a challenge in terms of resources and expertise. Our Success Programs were designed with your realities in mind to help prioritize your security initiatives and accomplish your security goals. With the help of our experts, we guarantee a successful vulnerability management program to improve your cyber security defense.

Continuous guidance

Providing advice and guiding you from day one of your vulnerability management program to ensure you and your team are successful. This guidance develops with you to keep delivering a tailored approach.

Best practices

We help implement best practices to optimize your internal processes and key metrics so you can measure performance over time.

Training & education

Ensure you get the most out of our platform through continuous training and education on existing and new features, functions, and tools.

Analyze & prioritize

We help you understand and prioritize vulnerabilities, enabling you to focus on the most effective measures.

Recurring meetings

Attend recurring meetings where we review status, progress, and the upcoming plan.

A complete & solid work process

We create a structured and solid vulnerability management program in cooperation with your team. The process is based on years of experience, and you are guided by our experts to develop your cyber security skills and maturity.

Our Success Program packages

Essential	Standard	Managed
We ensure your organization gets the most out of our platform. This package is a great way to establish the foundation of a vulnerability program.	Continuous advice and guidance related to prioritization, planning, optimized usage, and product news to make your vulnerability management program successful.	Get deeper insight into prioritization, planning, optimized usage, product news, and more. We also manage your Security Center, allowing you to spend time on your core tasks.

HOLM SECURITY

Valuable add-ons

Certification Programs

With the help of Holm Security's <u>Certification Programs</u>, you will gain all the knowledge and skills needed to implement a comprehensive vulnerability management strategy to stay one step ahead of cybercriminals.

Yearly report

An annual report that summarizes your chosen Success Program's efficiency for you and your management team.

Phishing simulation templates

Create custom phishing simulation templates with our <u>Phishing Simulation & Awareness Training</u> (if this is part of your license).

HOLM SECURITY

Why Holm Security?

1 Understand your attack surface

One of the key functions in Next-Gen Vulnerability Management is to help understand your attack surface using automated techniques to continuously identify new assets that could potentially expose your organization to risk.

2 Unified view to ease prioritization

Reduce business-critical risks with the least amount of effort. This is accomplished by providing a truly unified platform where all your risks are prioritized and listed in one single view.

3 Powerful threat intelligence

Our platform lets you focus on high-risk vulnerabilities and users likely to be exploited. Understand the full context of each exposure to maximize your efforts. Our platform also provides superior built-in threat intelligence to help understand and prioritize risk more efficiently.

4 Let the platform do the work

Our platform is fully automated. Once it's been implemented, it runs continuously in the background. No need for software or hardware.

How can we help?
